SITE SURVEY SHEET

MetriQ machine-vision inspection system

1. Visit details

Number	SV-[YYYY-NNN] · Rev. [0]
Customer	
Date, time	
Plant address	
Area / line	
Surveyed by (MTR)	
NDA	☐ Signed on _____ ☐ Not signed
Required PPE	
Plant allows	☐ Photos ☐ Video ☐ Samples off site

Attendees — customer

Role	Name	Title	Phone / Zalo	Email
Decision maker				
QA				
Production				
Maintenance / electrical				
IT				
Purchasing				

2. Current inspection

Item	Record
Inspection method, position on the line	
Inspectors per shift × shifts	
Defects that escape, frequency	
Cost of an escape	
How output and defects are recorded today	
Reason to act now	

3. Products to inspect

Product	Specification / size (mm)	Weight (g)	Placement on conveyor	Notes

Product	State (fresh / frozen / iced)	Touch / overlap	Surface wet, shiny, frosted	Colour variation between batches

Products per 1 m of belt	
Number of SKUs / sizes	

4. Quality inspection criteria

Product: name as in section 3, or All. Class: CR = critical, always reject · MA = major, reject · MI = minor, adjustable.

#	Criterion	Requirement	Product	Pass / reject threshold	Class
1					
2					
3					
4					
5					
6					
7					

Who decides borderline parts	
Governing standard / drawing	

5. Line and output

Item	Value	Notes
Belt width (mm)		
Product zone width (mm)		
Belt type, colour		
Belt speed (m/min)		
Output now / max (pcs/min, kg/h)		
Free height above belt (mm)		
Free length along belt (mm)		
Existing mounting points (frame, column)		
Reject mechanism	☐ Yes ☐ No	
Distance from station to reject point (mm)		
Encoder / product sensor	☐ Yes ☐ No	
Shifts, hours per day		

6. Environment

Item	Value	Notes
Light at belt (lux)		
Windows, direct sunlight	☐ Yes ☐ No	
Area temperature (°C)		
Humidity, steam, mist		
Water splash, washdown	☐ Yes ☐ No	
Cleaning method and frequency		
Vibration		
Food-safety rules for equipment near product		

7. Power, air, network (IT-OT)

Item	Value	Notes
Nearest power (V, phase), distance (m)		
Compressed air (bar), distance (m)		
LAN / Wi-Fi at the station		
Line PLC (brand, model)		
Remote access, tool		
USB; data leaving the plant		

8. Monitoring, alerts, reports

Output statistics	☐ Hour ☐ Shift ☐ Day ☐ Other: _____
Alert channel	☐ HMI ☐ Tablet ☐ Web ☐ Light ☐ Zalo ☐ Email
Alert recipients	
Where data is viewed	☐ At the line ☐ Office ☐ Phone
Report format	☐ Excel ☐ PDF ☐ Other: _____
Integration	☐ PLC ☐ MES ☐ ERP ☐ Not needed

9. Acceptance targets

Item	Value
Test sample size (pcs)	CR: _____ MA: _____ MI: _____
Max escape rate (%)	CR: _____ MA: _____ MI: _____
Max false-reject rate (%)	
Rate at which targets apply (pcs/min)	
FAT / SAT signed by	

10. Samples collected

Quantities in pieces (pcs).

Product	Good	Defective	Borderline	Sealed (FAT)	Storage

Samples labelled by	

11. Photos and video

	Content	File no.
☐	Wide view of the line area	
☐	Proposed station position	
☐	Belt from above, with product	
☐	Reject point / end of belt	
☐	Electrical panel, air point, network point	
☐	Light sources, windows around the station	
☐	Good, defective, borderline products (with ruler)	
☐	Video of normal production	
☐	Video of current inspection	

12. Commercial

Item	Information
Target installation date	
Budget range (VND)	
Approvers (technical, budget, purchasing)	
Supplier registration, number of quotes	
Required payment terms	
Invoice details (name, tax code, address)	

13. Other notes
